“The Effect of Financial Ratios on Stock Prices for the 2015-2018 Period on
The Indonesia Stock Exchange (IDX)”

Abstract

Stock prices can change every day, and sometimes these changes occur from time to time on the same day due to the influence of supply and demand for shares. The demand and supply for the common stock may increase or decrease due to various factors or determinants. To predict the development of stock prices with the technical analysis used three basic principles, namely Stock prices reflect relevant information, Information indicated by price changes in the past, and Changes in share prices will have a particular repetitive pattern. This study aims to analyze the effect of the company's financial ratios on stock prices in the 2015 - 2018 period. The data in this study are secondary times series data. Data analysis using multiple linear regression. The study results simultaneously the inflation rate or the rupiah exchange rate and the SBI interest rate significantly affected the company's stock price.
