The 2021 System Dynamics Conference - Virtually Chicago
Virtually Chicago, USA
July 26-30 2021

[Papers](#) and [workshops](#) presented at the conference are listed alphabetically by the last name of the first author, chair or presenter. All work was presented at the conference, and the presenting author is denoted by a *.

These materials are networking tools for members of the Society, those who attended the conference and the System Dynamics community more broadly.

The Conference provides a venue for presenting work and receiving comments that can strengthen the work and help to prepare it for wider distribution.

These conference record provides a complete record of presentations at the Conference. They are not intended to be a substitute for publishing in peer-reviewed journals, and some papers may be truncated or include only an abstract. The Society's conference record does not have an ISBN. The Bound, Printed Full Set or CD-ROM of the Record include an ISBN and those numbers are available from our [independent publisher](#).

Readers are encouraged to contact authors or search scientific and business publications to determine if more authoritative and up-to-date versions of works included here exist.

To find a paper by an author who is not the first author, simply search on the author's name. Papers are Acrobat® (.pdf) files and can be read using Acrobat® Reader® software available from adobe.com. Supporting materials are usually archives or models which may require additional software ([details](#)). Links, when shown, were supplied by the authors and were current at the time of publication.
